

# THE WALL PAINT!

## THE VALUABLE

Paint performance always depends on the quality of the binder. Our binders are produced from biobased raw materials. Biomass waste from oil production, e.g. olive or sunflower oil, is used to produce the binder. Unlike raw fossil materials (e.g. chalk), our bio-based raw material is a renewable resource, which can be replenished within the shelf life of the wall paint and is therefore not produced at the expense of humans, nature and animals.

FROM  
BIO-BASED  
RAW MATERIALS

## Environment

- Low CO<sub>2</sub> emissions
- Packaging made from 100% recyclable materials
- Binders are produced from bio-based raw materials

**GREEN AT HEART,  
COLOURFUL  
AT HOME.**

## Application

- Spatter-free
- Odourless
- Fast drying (dry to the touch after 1 hour – paintable after approx. 6 hours)
- Excellent hide & covering power (Class 1)

*easy  
peasy*

## Paint results

- Elegant, velvety, matte finish
- Highly scuff resistant (class 1)
- Very even finish due to excellent application flow and viscosity
- Strong colour brilliance

## Health

- VOC-free
- Solvent-free
- Water-based
